

FOR IMMEDIATE RELEASE

## Frontline Named Reseller of Mecel's MecApp Pro Bluetooth® Simulation Software

Charlottesville, Virginia, USA – May 15, 2012 – Frontline Test Equipment, Inc. is pleased to announce it has been named reseller for Mecel's [MecApp Pro Bluetooth](#) simulation software. Effective immediately Frontline will be offering MecApp Pro worldwide. MecApp Pro is a versatile and powerful *Bluetooth* interoperability testing and *Bluetooth* simulation tool for the Windows operating system.

MecApp Pro allows developers the opportunity to test their devices against *Bluetooth* profiles right in their own labs! This means they can provide improved interoperability and better products for the customers. It is based on the Mecel *Bluetooth* SDK which is widely used amongst leading product developers as a *Bluetooth* profile testing tool. The product builds on Mecel's proven MecApp Pro profile tester and adds new features including *Bluetooth* Low Energy and MAP.

MecApp provides the missing link in implementation of new profiles and improved *Bluetooth* interoperability.

- Supports all security modes including Secure Simple Pairing (SSP).
- Handle synchronous audio (SCO/eSCO) over USB when using the Hands Free profile.
- Continuously monitors link information such as AFH channel map, transmit power level, RSSI, clock offset and link quality.
- Support for UART, BCSP and USB transport layers.
- Supports Bluetooth Low Energy Technology

### About Frontline

Frontline is the world's leading provider of [Bluetooth protocol analysis](#) technology and the premier [Bluetooth device interoperability testing](#) (IOT) and [Bluetooth services](#) house. 84 out of the Fortune 100 companies use Frontline. Frontline's ComProbe line of *Bluetooth* analyzers are the de-facto industry standard and are used by hundreds of company's globally including, CSR, Broadcom, Atheros, Apple, Nokia, Samsung, Sony, Toshiba, Panasonic, and Marvell. Frontline maintains the world's largest *Bluetooth* device library for use in its IOT service organization. Frontline's technology has been integrated into the Bluetooth SIG's PTS qualification tool which is the system used to determine if a product meets *Bluetooth* interoperability standards. Frontline supports the entire range of *Bluetooth* technology: Basic Rate/Enhanced Data Rate, low energy, and High Speed.
