Get full access to improvements and additions to the ComProbe Protocol Analysis System software at the heart of every ComProbe protocol analysis product
- **VIP Technical Support**
Premium Maintenance assures that your technical issues receive first-tier support
- **Industry-Best Decodes**
Premium Maintenance means that you have the best and most up-to-the-moment decodes in the industry
- **Free for a Year!**
Purchase any qualified product and receive one free year of Premium Maintenance

Call sales support at **(800) 359-8570** today to learn more about how to start receiving the benefits of Premium Maintenance for your Frontline protocol analyzer.

What is Premium Maintenance?

Simply stated, Premium Maintenance is the best and most cost-effective way to keep your tools sharp.

Today's wireless technologies are constantly growing and evolving to accommodate the ever-changing landscape of consumer needs and devices. New *Bluetooth* profiles are always in development, creating the potential for thousands of possible profiles in the *Bluetooth* ecosystem, and Wi-Fi and NFC are at the leading edge of wireless development, with innovations coming practically daily.

Updates and changes to these technologies are managed and communicated through developer portals and working groups. As a leader in communications technology analysis, Teledyne LeCroy capitalizes on our unique industry access to ensure that our products support new profile information at almost the moment those changes are adopted - in the case of *Bluetooth*, **within one week** of the developer.bluetooth.org website.

Premium Maintenance assures that you can capture, decode and analyze any *Bluetooth*, Wi-Fi and NFC data, from the earliest release to the very latest specification, regardless of when you bought your Frontline protocol analyzer.

Why Premium Maintenance?

Every new software release is a snapshot in time, and without ongoing updates to the Frontline software at the core of all of our developer-class products, you could be missing support for important new profiles and changes to spec (e.g. support for the latest HFP and extraction of WBS data into WAV files). Moreover, new features and enhancements are being added to the Frontline software every day, including:

- Additions to our automation API
- Powerful new views like the Message Sequence Chart
- Improved Frame Display features, like user selectable columns
- New filtering ability

Premium Maintenance guarantees that you're as current as the technology itself, and that you are armed with the latest time-saving features and improvements for your Teledyne LeCroy protocol analyzer.

Premium Maintenance Qualified Products include:

Frontline Sodera®
Bluetooth Protocol Analyzer

Frontline Sodera LE
Low Energy Bluetooth Protocol Analyzer

Frontline TLF3000
Bluetooth Tester™

Frontline Harmony LE Tester

Frontline BPA® 600 Dual Mode
Bluetooth Protocol Analyzer

Frontline 802.11 Protocol Analyzer

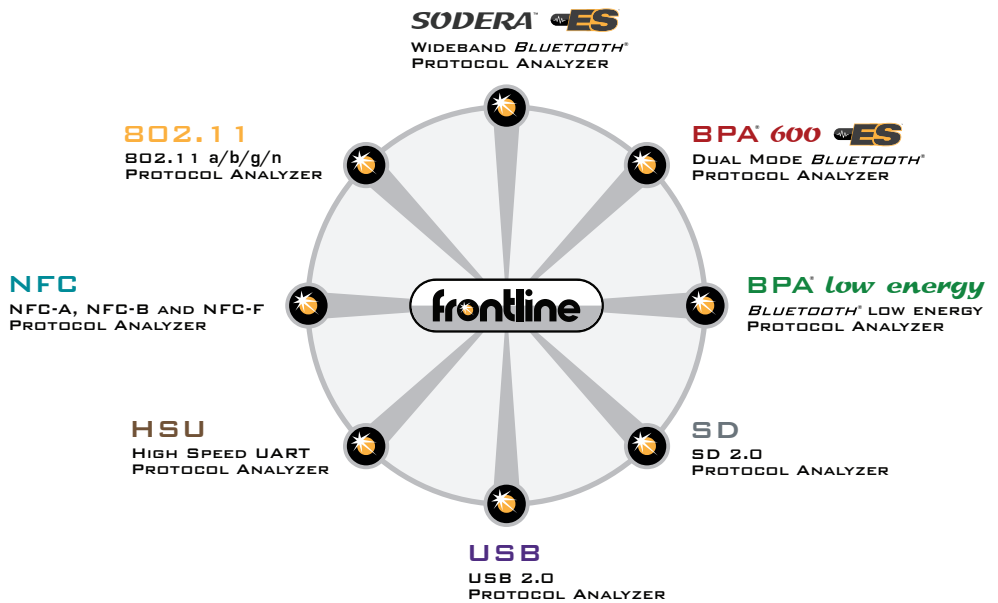

Frontline NFC Protocol Analyzer

How Do I Get Premium Maintenance?

Your initial purchase of a Teledyne LeCroy protocol analyzer from the Frontline family of analysis tools includes one year of Premium Maintenance during which time you can download all software updates, which are automatically communicated to you through the Frontline software interface the moment they become available. From profile and protocol changes to bug fixes and new analysis innovations from Teledyne LeCroy, you can keep your tools sharp at a minimal cost, and be sure that you are always ready for even the most advanced protocol analysis scenarios.

Call **(800) 359-8570** to make sure your Premium Maintenance is active, and that you're getting the most out of your Frontline protocol analysis tools.

The Frontline Modular Approach

Frontline software is at the core of Frontline protocol analysis, allowing technology-specific hardware interfaces to work individually or in combination with other hardware interfaces. This modular approach gives the developer or analyst the widest possible range of scenarios for debugging complex communications.
